Neonate Managed for Hypoglycaemia After Birth

Date...../...../.....

Addressograph Label

Dear Doctor..... ,

Thank you for reviewing baby and family. This baby was considered at risk for hypoglycaemia after the result of:

- Infant of diabetic mother (any type).
- Intrauterine growth restriction (< 10th centile for gestation).
- Low birth weight (< 2500 grams).
- Other

The infant was managed on postnatal ward / SCN / NICU for days and required the following management:

.....
.....
.....
.....

Ongoing care/monitoring required (e.g. monitoring weight gain, metabolic studies pending, etc.):

.....
.....
.....
.....

Thank you for your ongoing care of this family.

Regards,
